

PERSONAL lockers

Personal lockers - a place to call your own

1200 Series Personal Lockers are an essential component of the new office landscape, providing security for personal belongings. Dedicated personal lockers support hybrid workers when they are out of the office, providing an 'in office' space to keep items that are specific to the workplace.

Personal lockers can also be assigned to visiting colleagues who need a place to leave an overnight bag or backpack during their visit. Coming or going, it's a great solution that offers a flexible and secure personal storage solution for a wide range of spaces and applications.

A part of the everyday

1200 Series Personal Lockers are available with metal or laminate doors (shown) in a wide range of colors and finishes. All door fronts offer several locking options, high quality hinges and double wall construction, providing a secure and lasting solution.

66" high locker models provide full height hanging for coats and longer garments, along with a top shelf for smaller personal items. Three opening widths (10.5", 13.5" and 16.5") can be specified to support capacity requirements. Two cabinet depths (18" and 24") are offered to accommodate a range of personal belongings as well as interior architectural conditions.

It's personal

A modular solution

1200 Series Cubbies share the same modular dimensions and finishes as the locker models to provide an integrated open storage solution. The durable, powder coated, metal shelving and casebacks can be safely sanitized with a 10% bleach solution.

27" height locker models, fitted with an optional worksurface, can provide a storage island at sitting height to support a variety of tasks. 27" height models are available with a single door or with double doors (shown).

Metal doors for high traffic applications

1200 Series Personal Lockers with metal doors offer additional durability for high traffic applications. Metal lockers are finished inside and out with a powder coated epoxy finish, a process that produces very low levels of product waste, and results in a non-toxic, VOC-free, inert finish.

A hasp locking option for user supplied padlocks is available on all 1200 Series Personal Lockers. The padlock sits neatly in the recess of the metal lockers with integral full pull. A modular, sloping top cap is available to support housekeeping in eliminating unwanted articles on the top of the lockers.

Additional information can be found on the Global [website](#).
